**Noridian Licenses Total OnBoarding™
from Visionshare® and Foresight**

Healthcare EDI leaders link Medicare contractor and claims submitters via Total OnBoarding™ system.

MINNEAPOLIS – January 13, 2009 – Noridian Administrative Services LLC, www.noridianmedicare.com has selected Total OnBoarding™, a joint collaboration from VisionShare Inc. and Foresight Corporation that streamlines the healthcare claims submitter registration and testing processes through a secure, online system. Noridian has begun onsite beta testing of Total OnBoarding™ and will begin a controlled rollout of the system to their submitters over the upcoming months.

“We look forward to taking advantage of the technology developments of VisionShare and Foresight as they have joined together to create this ‘industry first’ product” said Doug Stack, NAS EDI Manager for Noridian. “Total OnBoarding™ allows us to move to an automated, self-service system that gives our submitters a great experience and gets them into production faster while reducing our overall cost of doing business, which truly makes this a win-win. We believe our submitters will welcome the level of security, transparency and efficiency Total OnBoarding™ affords.”

Total OnBoarding™ is the first automated, online self-service system that effectively guides healthcare providers and other claims submitters through the process of registration, establishing online security credentials, and testing. Upon successful completion of testing, submitters can elect to use the secure connection established through Total OnBoarding™ to initiate a direct, secure connection for processing claims and other HIPAA transactions.

“Total OnBoarding™ was developed with payers and Medicare contractors like Noridian in mind,” said John Feikema, CEO of Visionshare Inc. “Industry leaders and regulators are calling for more security, less fraud and more efficient billing. Total OnBoarding™ is a significant step in that direction.”

Total OnBoarding™ helps Medicare contractors and other healthplan payers streamline processes in a way that is user friendly for their submitters, eliminates multiple manual steps, simplifies enrollment, and moves new submitters into production, faster. Until now, these steps have been largely accomplished through paper forms and manual testing; both time-consuming and labor-intensive processes.

“Through Total OnBoarding™, Noridian will shorten the registration and test processes getting submitters into the production mode faster,” added Doug Spence, Executive Vice President from Foresight. “Total OnBoarding™ will keep Noridian ahead of the curve with regard to the new CMS and HIPAA standards for 5010 and ICD-10 compliance as they become effective in the coming months.

Total OnBoarding™ is a hosted service that can be branded according to the needs of individual customers. Private demonstrations of Total OnBoarding™ may be scheduled by calling 612.460.4360 or by e-mail to pam.bednar@visionshareinc.com.

About VisionShare

VisionShare, Inc, Minneapolis, Minn., is a leading provider of high-speed, low-cost data communication services for healthcare organizations.
